

1. What are the two types of strings?
 - (a) Open and closed
 - (b) Long and short
 - (c) Thick and thin
 - (d) None of the above
2. What is the significance of the string's vibrational modes?
 - (a) They determine the particle's mass and other properties.
 - (b) They are irrelevant to particle physics.
 - (c) They are only significant in certain contexts.
 - (d) They are not yet understood.
